This invention relates to a sheet inlet insert for a rolling mill. Sheet inlet inserts are used in roll stands and/or one or two former stands to provide an additional layer of metal in the form of a sheet metal strip. Such a sheet inlet insert is a component which is mounted on a basic stand and can include an inlet slot which extends along the longitudinal axis of the stand and is part of an inlet passage between the rear end of the rolling mill and the feeder channel which lies in front of the inlet slot. In the past such sheet inlet inserts have been made of cast iron. However, such iron sheet inlet inserts have not performed satisfactorily in the metal sheeting industry in that if they are worn, it causes the shape of the inlet slot to be changed, thus causing accelerated wear, i.e. the width of the slot to change. Furthermore, cast iron inlet inserts, in general, have a certain coefficient of thermal expansion which differs from that of the rolling mill roll cylinder, which is made of steel, and this difference in coefficients of thermal expansion is sufficient to cause a change in the size of the inlet slot as the temperature changes, which

The game was one of the biggest third-party titles to have come out in 2009. It was the first game in the series for a decade. The game had a fairly long development cycle taking approximately seven years to develop with the game originally being announced back on July 4, 2006. This gave the game seven years to build hype. Overall, the game was well received with a common criticism being that the game was too similar to the first two games in the series. The game would be the last game developed by Criterion Games.
