SketchUp comes in two versions: SketchUp Make (free) and SketchUp Pro (paid). There are various features which make the SketchUp Pro different from the free version, such as geometry creation tools, conditional styles support for multiple object types, advanced rendering settings for photo realistic output. The drawing or map can be saved in any of these file formats: DWG (AutoCAD), XML Paper Specification (XPS), PDF documents. These files can be viewed in Google Earth with the help of plugins.
