mp3 download of henry_bibliothek_cd03. athenry schoenknecht schnitterband henry schoenknecht schlagsprünge (cd-r: henry schoenknecht schlagsprünge; bibliothek: henry schoenknecht schlagsprünge) the first cd. Music CD by henry schoenknecht (current album: henry schoenknecht schlagsprünge).Q: Show textfield value when enter button pressed I've got a problem here. I'm trying to show the value of my text field when the Enter button is pressed. When I press the enter button it adds an empty value on the end of the string. I want to print the string with the value of the textfield with the string plus the " - ".
public void enterToNext(){ String decoded = decode(textField.getText()); if(decoded.equals("44.5")){ textField.setText("44.5 - "); textField.setText(decoded); } } A: Decode like this. String decoded = decode(textField.getText()); Your code always set text like "44.5". TextField doesn't have.equals(). And remove the textField.setText(decoded); Q: How to print a dictionary to text file I am a newbie in Python and I have a data file with two columns, id and value, something like this: 12 2 32 2 43 4 42 5 43 3 34 2 42 3 I want to output this file to a.txt file in a format like this: id, value, id, value, id, value 12, 2, 32, 2, 43, 4 32, 2, 43, 4, 42, 5 43, 4, 42, 5, 43, 3 34, 2, 42, 3, 42, 3 I tried to print(dictionary) but I got a list and I don't know how to convert to
